

## **REMARKS**

In the Office Action mailed **13 January 2005**, the Examiner objected to the Title of the present application for being not descriptive of the invention and imposed a requirement of a new Title. Applicant has amended the Title to reflect the method **Claims 1 - 12** still pending in the present application. The new Title as amended now reads: **"A METHOD OF MAKING A MAGNETIC TUNNEL JUNCTION DEVICE"**

The Examiner also required the Applicant to Cancel **Claims 13 - 18** to an apparatus in order for the present application to be considered allowed. Applicant has Canceled **Claims 13 - 18** as set forth on **Page 6** of the Claims Listing.

Finally, the Examiner stated that if the above requirements are met, then **Claims 1 - 12** to a method would be allowed.

## **ARGUMENT**

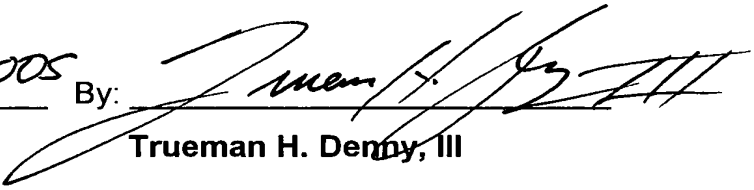

The Applicant respectfully submits that the Title as amended herein and the **Cancellation of Claims 13 - 18** places the present application in condition for allowance. Accordingly, the objections to **Claims 1 - 12** ought to now be withdrawn and **Claims 1 - 12** ought to now be allowed. Furthermore, the Examiners objections to the Title and the **Claims 13 - 18** ought now be withdrawn.

## **CONCLUSION**

The Applicant has amended the Title of the Specification and has Canceled **Claims 13 - 18** as required by the Examiner in the Office Action mailed **13 January 2005**. Consequently, **Claims 1 - 12** are in condition for allowance and the objections to those claims ought to now be withdraw. Therefore, the Applicant respectfully requests the present application be allowed and a timely issuance of a Notice of Allowance and Issue Fee Due.

Respectfully submitted,

**Heon Lee**
